EDUCATION

M.Sc. Informatics — in progress

Universitas Hasanuddin (UNHAS)

S.Kom. (Informatics) · GPA 3.92/4.00

Univ. Muhammadiyah Makassar (2018–2022)

Best Graduate, Faculty of Engineering

CERTIFICATIONS

Kemendikdasmen RI — Bimtek Pengajar Koding & KA, 40 JP (2025)

LSP Unismuh — Pengajar Koding & KA, 180 JP (2025)

Oracle Academy — AI/ML in Java · Java Foundations · DB SQL · DB Foundations (2024–26)

Cisco NetAcad — Instructor, 1 Yr of Service (2022)

01 PROFESSIONAL SUMMARY

Independent full-stack engineer who has shipped 200+ real projects across web, AI, and developer tooling.

I design and build **production-grade web applications, SaaS dashboards, and AI-powered tools** end-to-end — from database schema to polished UI. My strongest work is in **long-running, complex systems**: full-stack plagiarism-detection platforms, digital-election backends, multi-tenant SaaS, and institutional management systems — several maintained in production for **12–16 months** each. Over **5+ years** I've authored **205 original repositories** (80 TS · 39 JS · 36 Python) on the **Next.js / Node.js / Prisma** stack and **Indonesian-language NLP**. I turn vague ideas into reliable products and stay with them for the long haul.

02 PROFESSIONAL EXPERIENCE

Metito

Indonesia

Jun 2025 – Jun 2026 · contract

Fullstack Engineer — applications & systems supporting water & wastewater treatment operations across Indonesia (metito.id).

PT Ide Kreatif Asia — Saku Sultan

Dec 2022 – Jan 2025

Fullstack Developer — production e-wallet live on Google Play & App Store (10K+ installs, 4.7★): React Native app, Go backend (RabbitMQ + Kafka), admin dashboard.

Univ.

Muhammadiyah Makassar

Jul 2022 – Jan 2025 · contract

Fullstack Developer — built SINTEKMu, the faculty information system (6 role levels), live at simtekmu.teknik.unismuh.ac.id (580+ commits).

DPRD Prov. — Kota Sinjai

Oct 2023 – Mar 2024 · project

Software Engineer — real-time election vote-monitoring application; delivered to spec.

devnolife studio

2021 – now · independent

Full-Stack & AI/ML Engineer — 200+ shipped projects for clients & institutions; LLM/RAG production backend (Go) powering fokusngajar.id.

03 SERVICES I OFFER

› Full-Stack Web & SaaS

Next.js, React, Node.js, TypeScript & Prisma — dashboards, auth, REST APIs, multi-tenant SaaS.

› OCR & Document Automation

Scan, extract & auto-generate documents, certificates, reports and academic papers.

› Computer Vision & Multimedia

Image processing, segmentation, face-swap & media pipelines in Python.

› AI & NLP Solutions

Text summarization, paraphrasing, semantic plagiarism detection & LLM integration (esp. Bahasa Indonesia).

› WhatsApp API & Bots

Messaging automation, notifications, OTP & SaaS admin dashboards on top of WhatsApp.

› Mobile Apps

Cross-platform apps with React Native & Expo Router, NativeWind styling.

04 FLAGSHIP PROJECTS — longest-running & most complex builds

PemiluDigital — E-Voting

~1 yr · TS + SCSS

Flagship & most complex build: full-stack digital-election platform — TS backend (~224 MB, my largest) + admin panel; voter data, real-time tallying, RBAC & auditing.

[Client](#) · [backend](#) · [admin](#) · [private](#)

Turnitin Plagiarism Platform

~16 mo · Node + SCSS

Full-stack OCR plagiarism-detection system (REST backend + dashboard) — longest-running build at ~500 days.

[Frontend: github.com/devnolife/turnitinApp-frontend](#)

SaaS GuruPintar

~16 mo · TypeScript

Multi-tenant SaaS for an education product — auth, subscriptions & admin dashboards over 475 days.

[Client project](#) · [private](#)

SAKTI Dashboard

15 mo · TS · LIVE

Enterprise operations dashboard (~97 MB) with rich data views & reporting, in production for 450 days.

[Client](#) · [live](#) · [private](#)

LPKA Management System

12 mo · Next + Prisma

Institutional management platform with complex relational data, served in production over 367 days.

[Client](#) · [live](#) · [private](#)

WhatsApp API Service

11 mo · JavaScript

Messaging-automation & integration layer (notifications, OTP, bots) over 328 days.

[github.com/devnolife/whatsapp-api](#)

Certi-Gen Distributor

12 mo · JavaScript

Automated certificate generation & bulk distribution via email and WhatsApp; built over 352 days.

[github.com/devnolife/certi-gen-distributor](#)

05 TRAJECTORY

2021–22 Getting Started · first builds

Began coding daily — fundamentals in PHP, JavaScript & Python; first apps & early client work.

2023 Foundations · 14 projects

CRUD & REST boilerplates, JWT auth, first dashboards. Open-sourced **crud-node-prisma** (now 21★).

2024 Product & Automation · 45 projects

SaaS dashboards, document & certificate generators, WhatsApp automation, fullstack Next.js starters.

2025 AI, Vision & Research · 131 projects

Indonesian NLP (summarization, paraphrase), computer vision, OCR, steganography & document security.

2026 Shipping at Scale · 49+ projects

Production apps — LMS, e-commerce, capstone, payment & education platforms.
