- MongoDB
- Redis

BY THE NUMBERS

- 212original repositories
- 200+products shipped
- 16 mo longest single build
- 5+ yrsbuilding daily

LANGUAGES

- Bahasa Indonesia — Native
- English — Professional

PROFILE

Full-stack software engineer with 5+ years building and shipping production-grade web, SaaS, mobile, and AI products. I work across TypeScript/Next.js, React Native, Node/NestJS/Go, and Python for AI & NLP. 200+ projects shipped end-to-end — including a digital e-wallet live on Google Play & the App Store (10K+ installs, 4.7★). I build products that last and stay with them after launch — most run 12–16 months in production. Founder of devnolife studio.

EXPERIENCE

Founder & Full-Stack Engineer

- devnolife studio (Freelance) · 2020 – Present · Makassar
- Shipped 200+ projects across full-stack web, SaaS dashboards, mobile, and AI/NLP.
- Saku Sultan — built & shipped a digital e-wallet to Google Play & the App Store (10K+ installs, 4.7★): React Native app, NestJS→Go backend, admin dashboard.
- SINTEKMu — faculty information system with 6 role levels; live in production (580+ commits).
- Turnitin platform — OCR + semantic-similarity (NLP) plagiarism detection with a Next.js dashboard.
- PemiluDigital — end-to-end e-voting with real-time tallying, RBAC, and a full audit trail.
- SaaS GuruPintar — multi-tenant AI platform generating lesson plans & materials for teachers.

SELECTED PROJECTS

Saku Sultan — e-wallet, React Native + Go	Play & App Store
SINTEKMu — faculty system, 6 roles	simtekmu.teknik.unismuh.ac.id
LPKA Management — RBAC, 135 commits	Next.js · Prisma
Magic IDE — browser Python IDE	github.com/devnolife/magic-ide
WhatsApp API — OTP, notifications, bots	github.com/devnolife/whatsapp-api
LLM Wizard Research — neuro-symbolic AI	github.com/devnolife/llm-wizard-research
